

HAVENS has formulated a new and unique feed for all horses and ponies that suffer from digestive problems or stomach ulcers: **the Gastro+**:

- Blended with a special cocktail of sodium bicarbonate, calcium carbonate, magnesium and additional probiotics to sooth the stomach and neutralise excess acid. This helps to regenerate the stomach lining.
- Gastro+ is a nutritionally complete feed with a high specification of amino-acids, vitamins (i.a. 400mg Vit.E), and trace elements; providing your (sport)horse with all nutrients it needs.
- Low starch content in combination with a high content of alfalfa, promoting the chewing and saliva production. Alfalfa and saliva are both proven to be a natural buffer to acidity in the digestive tract
- Extra oil is included with an optimal omega-6 to omega-3 fatty acid ratio that favours ulcer healing. Also, it provides slow releasing energy to support optimal performance.

### Nutritional values Gastro+ /kg

Energy	MJ	12
Carbohydrates	%	39%
<b>Macro-Nutrients:</b>		
Starch	%	16,7%
Sugar	%	6,0%
Crude fiber	%	15,0%
Digestible protein	%	10,7%
Crude protein	%	12,2%
Crude fat	%	6,0%
(% unsaturated)	%	65%
Crude ash	%	9,2%

### Essent. AminoAcids (T):

Lysin	g	5,5
Meth+Cys	g	2,4
Threonin	g	4,9
Tryptofan	g	1,6

### Vitamines (A):

Vit. A	IE	19.920
Vit. D-3	IE	3.320
Vit. E	mg	400
Biotin	mcg	160
Vit. B-complex	*	****
Vit. K3	mg	1,4
Vit. B1	mg	4,1
Vit. B2	mg	6,8
Panthenotic Acid	mg	27,5
Niacine	mg	51
Vit. B6	mg	4,0
Vit. B12	mcg	27,2
Foleic Acid	mg	4,0
Choline-Chloride	mg	204
Vit. C	mcg	250

### Minerals (T):

Ca/P-Ratio		2,7
Calcium (Ca)	gr	12,5
Phosphorous (P)	gr	4,7
Magnesium (Mg)	gr	3,5
Sodium (Na)	gr	5,5
Potassium (K)	gr	14,9

### Trace-Elements (T):

Iron (Fe)	mg	455
Copper (Cu)	mg	25
Zinc (Zn)	mg	200
Manganese (Mn)	mg	120
Cobalt (Co)	mg	2,0
Iodine (I)	mg	1,0
Selenium (Se)	mcg	490

Form: cubes  
Packaging: 20 kg

T = total  
A = added  
Datasheet subject to change (March 2016)

## How to feed Gastro+

Gastro+ is a fully balanced feed with a very high dosage of vitamins (i.a. 400 mg vit. E), trace elements and amino acids. This makes the cubes ideal for equine athletes.

The unique and highly concentrated formula makes it possible to feed Gastro+ according to the following schedule:

	HAVENS Gastro+	HAVENS MIX*
Morning	1 kg	0,5 kg
Lunchtime	1 kg	0,5 kg
Evening	1 kg	0,5 kg

\* Supplementary adding HAVENS MIX is not a requirement, but it will enhance the efficiency of the Gastro+.

When the intestinal tract has sufficiently calmed over time, the Gastro+ ration may partially be replaced by the originally fed compound feed. The advice is however, to continue feeding Gastro+ once daily (lunch-time ration).

During stressful periods, we advise to switch (timely) back to a complete Gastro+ ration. Stress is a major cause for the occurrence of gastric ulcers and/or digestive problems.

## Important

Feeding Gastro+ will only lead to optimal results if the entire feed management is optimized. Concentrates will only come to their justice when a horse has access to sufficient fibres.

It is therefore important to supply unlimited roughage alongside Gastro+. This does not result in horses with a bloated stomach, because Gastro+ optimizes the gastro-intestinal digestion.

The ration has a soothing effect on the digestive tract and as a result all the available energy can be fully used to deliver performance.
